DETAILED ACTION

Election/Restrictions

1. Upon initial review of the claims it appears that claims 1-21 differ in subject matter and therefore require a different search. In accordance with this, a restriction is deemed proper.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5 and 16-18, drawn to a method for network resource navigating, classified in class 715, subclass 738.
 - II. Claims 6-15 and 19-21, drawn to an apparatus wherein subject matter is configured for a particular apparatus, classified in class 715, subclass 831.
3. Inventions Groups I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to process data across a LAN.
4. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.

Numerous phone calls were made to applicant's representative to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
